

## Liste der Firmen im Zhongguancun Life Science Park

Firma	Kurzprofil	Internet
TaKaRa Biomedical Technology (Beijing) Co., Ltd.	A subsidiary company established by TaKaRa Bio INC. Main business of the R&D center: Gene therapy, cell therapy-based biomedical technology development and services.	<a href="http://www.takarabiomed.com.cn">www.takarabiomed.com.cn</a>
Genzyme (Beijing) Bio-technology R& D facility	Invested by Genzyme. Main activities: (MACI) Matrix-induced autologous chondrocyte transplantation lab production, Thymus preparation and research, animal testing experiments.	<a href="http://www.genzyme.com">http://www.genzyme.com</a> Under construction
Beijing Syntech Medical Instruments Co., Ltd	Production and sales of hemorheology automatic testing equipment	<a href="http://www.steellex.com">www.steellex.com</a>
Vital River Laboratories (VRL)	As the leading and the biggest supplier of laboratory animals in China, Vital River Laboratories (VRL) dedicates to offer integrated laboratory animals and related services in support of biopharmaceutical research. Since founded in the end of 20th century, Vital River engaged in refining breeding practice of SPF laboratory animals in isolator and barrier facilities. Now Vital River has more than 250 employees, and provides 27 strains of rats, mice, hamster and guinea pig from 4 state-of-the-art facilities.	<a href="http://www.vitalriver.com.cn">www.vitalriver.com.cn</a>
Beijing C&N International Sci-tech Co., Ltd	R&D of biotech drugs and outsourcing services for drug discovery, development and preclinical evaluation. The government of China has authorized C&N to build National Engineering Research Center for Protein Drugs. C&N is also the sponsor and partner of Human Liver Proteome Project (HLPP) initiated by Human Proteome Organization.	<a href="http://www.c-nintl.com/">www.c-nintl.com/</a>
Beijing Institute for Drug Control	Drug control institute established by Beijing Municipal Government. One of the earliest port drug control institute in China.	<a href="http://www.bidc.org.cn">www.bidc.org.cn</a> not constructed
National Institute of Biological Sciences, Beijing	National class basic research institute specialized in original basic research. US Academy of Sciences Dr. Wang Xiaodong and tenure of Yale University Dr. Deng Xingwang are directors. 500 researchers including 145 PhD, 60 post-doctorals. The institute publishes over half of the articles in China on world's top magazines like Cell. The projects being researched in the institute covers the main areas of life sciences. Like Wang Xiaodong's Cell Apoptosis study, Deng Xing Wang's "The role of light on plant" and Zhang Hong's research on "Gene silencing"	<a href="http://www.nibs.ac.cn">www.nibs.ac.cn</a>
Waitai Pharmaceutical	Production in vitro immune diagnostic reagents and genetic engineering of new vaccines. Company's engaged in the research and production of diagnostic reagents for more than ten years. Provide the full set of blood screening reagents like HBsAg, HCV, HIV, TP, TRUST, HTLV, CMV. A rare diagnostic reagent producer of complete products.	<a href="http://www.ystwt.com">www.ystwt.com</a>
Beijing Haiyan Pharmaceutical, Yangtze River Pharmacy Group	Subsidiary of Yangtze River Pharmacy Group. Comprehensive pharmaceutical enterprise integrates R&D, production and sales. Main business is the products of Tablets, capsules, granules, oral liquid, syrup, ointment, freeze-dried powder, large volume injection, small volume injection etc.	<a href="http://www.bjhaiyan.com">www.bjhaiyan.com</a>
CapitalBio	CapitalBio is committed to Develop and deliver innovative products and services in integrated health care area (including Prediction, prevention and personalized medicine). It has successfully developed dozens of products and services in biochip and relevant equipments, reagent supplies and software database. More than 10 of them are international initiatives.	<a href="http://www.capitalbio.com">www.capitalbio.com</a>
Origin Agritech Limited	A leading agricultural biotechnology company and a top player in seed industry, specializes in research and development, production, sale and distribution of agricultural crop seeds. The Company's major seed products are corn, rice, cotton and canola.	<a href="http://www.originseed.com.cn">www.originseed.com.cn</a>
Sensitive High Resolution Ion Microprobe (SHRIMP) Centre	Core business is high-resolution, high sensitivity ion microprobe mass spectrometers. The SHRIMP Center is a large scientific instrument center built by Ministry of Science and Technology, Ministry of Land Resources and Chinese Academy of Sciences. SHRIMP is currently the most advanced micro-area and soil depth image analysis instrument.	Not Constructed
Beijing Origin Water Technology Company (Origin Water)	Beijing Origin Water Technology Company (Origin Water) is a leading high technology company based in Beijing, China. The company is involved in environment protection and resource recycling. Its core business relates to the use of novel membrane filtration systems in municipal and industrial sewage treatment and recycling. Other main businesses involve water and drinking water research and development, technologies for solid waste disposal, project design and construction. Its non-core business relates to the manufacture of equipments for water and wastewater treatment.	<a href="http://www.originwater.com">www.originwater.com</a>

Busch Technology	A German high-tech company.Busch's principle is to take German advanced ecological, energy saving, environmental protection technology in construction as the basis,through research on human living environment and transfer the results into industry value chain, promote Promote human health and prevent and reduce the incidence of disease, thus to Promote international advanced environmental protection technology services in	<a href="http://www.huf-haus.com">www.huf-haus.com</a>
Syngenta Biotech(China) Co.,Ltd	As Syngenta's sixth global Research and Technology Center, SBC (Syngenta Biotechnology China) was established in Beijing Zhongguancun Life Science Park in early 2008, making Syngenta the first foreign agribusiness to set up its biotech R&T institution in China.	<a href="http://www.syngentabiotech.com.cn">www.syngentabiotech.com.cn</a>
NutriChem	Chiral drugs, intermediates and fine chemical product development, production, sales and registration services	<a href="http://www.nutriechem.com">www.nutriechem.com</a> Not Constructed
PKU International Hospital	"3A" with 1800 beds.	<a href="http://www.pkucare.com">www.pkucare.com</a> Under Construction
PKU-Care Pharma	The company specializes in innovative drugs with independent intellectual property rights and providing high value added preparations and API services to Peking University International Hospital Group Medical Division manufacturing and marketing platform.	<a href="http://www.pkucare-pharm.com">www.pkucare-pharm.com</a> Under Construction
Bo Hui Innovation Tech CO.,Ltd	R&D and production in medical testing equipment and reagents.Own 7 domestic patents. Main Products:nearly 10 products in Lead and cadmium in elemental analyzer system, the five elemental analyzer system, seven element analysis system. The products are used for detection of trace elements in the human body.	<a href="http://www.bohui-tech.com">www.bohui-tech.com</a> Not Constructed
Mindray	Mindray was founded in 1991 with the goal of delivering high-quality, competitively priced medical devices to make healthcare more accessible and affordable around the world. In 2006, we were listed on the New York Stock Exchange and are now a leading, worldwide developer, manufacturer and marketer of medical devices .Mindray is dedicated to R&D and production of clinical medical equipment.The products are in the areas of life information monitoring, clinical examination and reagents, digital medical imaging, clinical anesthesia systemIn 2006, Mindray listed on the New York Stock Exchange.	<a href="http://www.mindry.com">www.mindry.com</a> Not Constructed
New Era Health Industry Co.,Ltd	Subsidiary of China New Era Holding (Group) Company.Business based on the defense industry, military and civilian, set import and export of civilian goods, the modern service industry, health industry, investment and investment management.	<a href="http://www.5dgz.com">www.5dgz.com</a> Not Constructed
Long Yi Biotech	Through its subsidiaries, engages in the development, manufacture, and marketing of superoxide dismutase (SOD) products in China. SOD is a naturally occurring enzyme that acts as a potent antioxidant defense in oxygen exposed cells. The company primarily offers Jiuzhou SOD plant wine under the name Jiuzhou Holy Wine, which is a product developed from the zymolysis of natural wide berries. It also intends to produce SOD oral liquids and capsules, as well as SOD medicines and skin care products. The company is based in Beijing, the People's Republic of China.	<a href="http://www.allsod.com">www.allsod.com</a>
Kohnoor Sci-tech	Biomedical technology development, outsourcing technical services, technical advice and sales of reagents and consumables.	<a href="http://www.bjkohnoor.com">www.bjkohnoor.com</a>
Jehuo Aikang Information Services Ltd.	Providing information support and application platform to medical institutes, medical manufacturing enterprises, medical marketing enterprises and relevant gov departments. Also provide all round health information service platform to netizens.	<a href="http://www.jehuo.com">www.jehuo.com</a>
Beijing Anxiao Technology Co.,	Medical instruments in Electrophysiology R&D, diagnostic and treatment.	
Novo Nordisk	R&D Center of Novo Nordisk Denmark.	<a href="http://www.novonordisk.com.cn">www.novonordisk.com.cn</a>
Beijing Heraeus Biomaterials Co., Ltd.	German Heraeus Group's wholly owned subsidiary. Focusing on Dental Materials R&D and production.	
BEIJING B&M BIOTECH CO., LTD	Founded in 2005, is a Sino-Japanese joint venture.Antibody engineering research and research reagents and clinical diagnostic reagents	<a href="http://www.bio-med.com.cn">www.bio-med.com.cn</a>
National Medical	Beijing National Medical Ltd. is a worldwide famous manufacturer of ETCO2 modules. National Medical's mission is to develop, market and manufacture mainstream and sidestream CO2 gas module, multi-gas modules. At the same, National Medical had developeoed NIBP, SPO2, ECG modules years	<a href="http://www.nationalmed.com.cn">www.nationalmed.com.cn</a>
Core Technology	Rapid diagnostic reagents, test card, test strips, diagnostic reagents	<a href="http://www.kuerkeji.cn">www.kuerkeji.cn</a>
Center for Clinical and Basic Research(Beijing)	Clinical and basic research	<a href="http://www.Synarc.com">www.Synarc.com</a>
Nordicbioscience(Beijing)	Founded by Nordic Bioscience A/S, which is headquartered in Denmark with the commitment to the development of novel therapeutic compounds and diagnostic products for improved management of patients with chronic, degenerative diseases such as osteoporosis, osteoarthritis, cardiovascular	<a href="http://www.nordicbiosciencechina.com">www.nordicbiosciencechina.com</a>
Beijing ABT Genetech Engineering Co., Ltd.	ABT is a biopharmaceutical company focused on designing and developing therapeutic antibody drug for treating cancer, autoimmune and inflammatory diseases.	<a href="http://www.shunfa.net.cn">www.shunfa.net.cn</a>

Deyi Hekang	High-tech enterprise focusign on in vitro diagnostic reagent production, R&D, sales and tech services.Product:Prostate cancer diagnostic reagents.	
Vicar Group	R & D focus on: 1)New vaccines for prevention and control of major communicable diseases, 2)vaccines for special aquatic animals or important economic animal 3) Animal small interfering RNA (siRNA) 4) vaccine for drug resistant bacteria and ineffective control parasitic disease 5) genetic engineering and fermentation of new veterinary drugs and feed additives 6) new drug delivery system and nano-drugs 7), new adjuvants, immune enhancer 8) Modern Veterinary	<a href="http://www.vicagroup.com.cn">www.vicagroup.com.cn</a>
Lawke Clinical Laboratory Limited	Drugs R&D testing service platform recognised by US CAP.Provide clinical outsourcing services to international pharma enterprises, and provide clinical testing and pathological diagnostic services to about 200 pharmaceutical, healthcare management and research institutes. Also Provide testing and screening services to special needs.	<a href="http://www.lawke.com">www.lawke.com</a>
Beijing RJA Biotech Co.,Ltd		
BioDuro	BioDuro is a leading integrated drug discovery outsourcing company that provides high-quality, integrated research and development services to biopharmaceutical clients. Our services range from medicinal chemistry to discovery biology, pharmacology, drug metabolism and pharmacokinetics (DMPK) and drug safety evaluation.	<a href="http://www.bioduro.com">www.bioduro.com</a>
Laviana	The company was established by America returned staff and overseas experts.an R&D outsourcing enterprise focusing on innovative molecule drugs.provide medicinal chemistry research to Major international pharmaceutical companies, and outsourcing services to new pharmaceutical intermediates and API synthesis technology development pilot production of synthetic drugs and new drugs production.	<a href="http://www.lavianacorp.com">www.lavianacorp.com</a>
Beigene Biotech	BeiGene is a Chinese life sciences biotechnology company based in Beijing that is focused on discovering and developing innovative oncology drugs that will address unmet medical needs in cancers that are prevalent in China and the Asia-Pacific region.	<a href="http://www.beigene.com">www.beigene.com</a>
Fu Rui Tang	committed to investment in medical health field	
HuaXi Pharma	Huaxipharm Co., Ltd is an emerging, research-based pharmaceutical company headquartered at Beijing, in the capital of China. The company, run by a professionally qualified and capable management, is focused on the discovery, development and marketing of medicine, active pharmaceutical ingredients,API and the related CRO services in China as well as globally.	<a href="http://www.huaxipharm.com">www.huaxipharm.com</a>
Incubator of Life Science Park	An incubator serves small and medium sized compnies in bio medical field.	<a href="http://www.bjbmp.com">www.bjbmp.com</a>
Funsea Sci-tech	committed to separation of chiral drugs chromatographic purification technology development, to become experts in chiral preparation of	<a href="http://www.funsea.net">www.funsea.net</a>
Botanic Century	research and development in herbal and plant products.Over many years, Botanic Century has developed its own product pipeline in the area of POI (Post-Operative Ileus), bacterial infections, diabetes and Hepatitis C. At the same time it has built up an integrated research platform and accumulated expertise on botanical product development.	<a href="http://www.botaniccentury.com">www.botaniccentury.com</a>
Beijing H&J Novomed	Mainly engaged in in vitro diagnostic reagents, the products are autoantibody detection kit Rheumatology	<a href="http://www.hjnovomed.com">www.hjnovomed.com</a>
Tarcine	Produxts being researched in mainly on Nasopharyngeal cancer, liver cancer, lung cancer, kidney transplant rejection and bladder cancer	<a href="http://www.tarcine.com">www.tarcine.com</a>
Genstar	Focusing on providing Biological research reagents.The products are related to the fields of PCR and RT-PCR, nucleic acid purification, gene cloning, protein detection and purification, cell biology.	<a href="http://www.genstar.com">www.genstar.com</a>
Reach Surgical	Wholly owned by US REACH SURGICAL, INC.A supplier of automatic stapler specialized products and minimally invasive surgical products	<a href="http://www.reachsurgical.com">www.reachsurgical.com</a>
Biocytogen	a High-tech bio-technology development company,committed to developing knockout mouse model.The developed mouse model is mainly used for new drug development and basic biomedical research.	<a href="http://www.biocytogen.com">www.biocytogen.com</a>
Beijing Brain-King Limited Co., Ltd.	Beijing Brain-King Limited Co., Ltd.,is a high-tech enterprise of bio-scientific instruments and reagents with outstanding R & D capacity and hig-class level of modern management.The company has developed 4 products:1) laser and optical fiber based on small-scale activities of nerve cells and inhibit activation of the system; 2) based on ultra-small micro-motor propulsion motor and electrophysiological recording systems; 3) mouse behavioral training and testing automated systems; 4) mouse head fixed on the control system.	<a href="http://www.bbk-biogene.com">www.bbk-biogene.com</a>
Insight Finechem	Beijing Yingli-Jinghua Technology Development Co., Ltd,mainly engaged in research and development of fine chemicals, contract manufacturing,import and export business.	<a href="http://WWW.IFC.CN">WWW.IFC.CN</a>

Beijing Borun Tianhui	Provide processing technology and R&D in new products, intermediates, custom synthesis. It has developed production of catalytic hydrogenation of nitrobenzene Aminophenol technology, catalytic hydrogenation of o-nitrotoluene production AMT technology, EHA production technology, and has formed with its own set of characteristics catalytic hydrogenation production technology.	<a href="http://www.ice-biosci.com/">http://www.ice-biosci.com/</a>
ICE BIOSCIENCE CO.Ltd	ICE-Bioscience is a rapidly growing Chinese-based preclinical CRO specialized on in vitro and in vivo services. The company is especially experienced in the highly specialised electrophysiological field. We offer unique preclinical services in the ion channel pharmacology and safety assessments. We provide a flexible, high quality, efficiency service with low cost that meets the needs of a wide range of biopharmaceutical companies.	
Animal Husbandry Industry Co., Ltd. (Veterinary Research Institute)	An R&D institute of Animal Husbandry Industry Co., Ltd. R&D scope: (1) R&D of animal vaccines, veterinary drugs. 3 projects have won State Veterinary Drug Certificate and 2 are being researched. (2) The institute has composite technology R&D platform which integrates the research process of antibiotic fermentation, peptide synthesis, chemical synthesis. And established collaborations with several universities and research institute. Many projects have been supported by the government.	
Beijing QMLC Stem Cell Technology Co., Ltd.	Beijing QMLC Stem Cell Technology Co., Ltd. is committed to research, development, production, sales, and clinical application of stem cells. Our main tasks are categorized as the following: to distribute novel stem cell technologies and products; to do basic research and therapeutic application of stem cells, including the purification, cultivation, expansion, induction, differentiation and identification of the adult or embryonic stem cell. We also specialize in researching, developing and selling tissue engineered and gene engineered products.	<a href="http://www.qmlc.com.cn">www.qmlc.com.cn</a>
Peoplespot Incorporated	Peoplespot Incorporated is a high-tech biotechnological company specializing in DNA identification and the research, development, application and popularization of products thus related, as well as services.	
Daicelchiraltech	Provide quality, rapid and economical development of chiral separation and preparation services to domestic and foreign pharmaceutical companies, drug research and development institutions, research institutes, universities, etc.	<a href="http://www.daicelchiraltech.cn">www.daicelchiraltech.cn</a>
Beijing Weitafa R & D Co., Ltd.	Anti-cancer drug development and drug formulation process development	<a href="http://3722074.71ab.com/">http://3722074.71ab.com/</a>
Beijing Shidai Yugong Pharma	The development of new anticancer drugs and achievement transfer.	
Beijing Unimedex Technical Development Limited company	The main business is the development of medical devices and drugs; And foreign medical technology transfer and commercialization in China. A "medical device of urine and urinary drainage bag" is in the stage of test development.	
Beijing A En Ti Biotech	The company mainly engaged in the AJS2008 La fine (LIVYGENE) cancer drug research and development.	
Beijing Geno-lab Biotechnology Co., Ltd.	Beijing Geno-lab Biotechnology Co., Ltd., is specialized in molecular biology services, high-tech enterprises; and our current core services include DNA sequencing, gene synthesis, DNA extraction, library construction, microarray data analysis, scientific research services, genomics data analysis and drug screening, and so on.	
Berrygenomics	Gene sequencing services company.	<a href="http://www.berrygenomics.com">http://www.berrygenomics.com</a>
Beijing Hanteng Wanger Biotech	Wanger Biotech, established in 2002 in the capital city of China, has now become a leading manufacturer and distributor of rapid tests for food and feed safety, animal diagnostics in China. Wanger Biotech is one of earliest professional companies specialized in food safety ELISA kit development, monoclonal antibody production and immunoassay technology research in China.	
Wanda Chuangzhi	Biotechnology development, technology transfer, technical advice.	
Beijing Yourong Jiqian Biotech	Surgical dressings biomedical R & D and production.	
Beijing Yongyuan Shengjing Bio Pharma technology	R & D and sales of TB diagnostic reagents	
Yicheng Ruisi(Beijing)	Pharmaceutical industry research and consulting	
Fenghui Huanong (Beijing) Biological Technology Co., Ltd.	Technical development of biological pesticides, biological pesticides sales, technical advice.
