3	China Great Wall Asset Management Corporation	NPL (non-performing loans/assets) Disposition, Financial Services	<p>Approved by Chinese government, China Great Wall Asset Management Corporation is a wholly stated-owned financial institution with an independent corporate status. Registered capital of the company is RMB 10 billion Yuan fully paid by the Ministry of Finance, the People's Republic of China. It is great significance to establish the Great Wall AMC for guarding against and dissolving financial risks, deepening financial and banking system reform, and sharpening international competitive edge of the State-owned Commercial Banks by means of purchase, management and disposal of non-performing assets stripped off from the state-owned commercial banks. The company will take advantage of its particular legal position and professional expertise to maximize the recovery value of non-performing loans/assets and preserve the state assets to the greatest possible extent of the value by use of different operational methods including debt collection, assets transferring, leasing, assets portfolio and auction, debt restructuring, enterprise's reorganization, debt-equity swap, and assets securitization. Furthermore, through the specialized operation, it will accelerate the development of the capital market in China and the innovation of modern financial instruments as well as the establishment of regular social credit relationship and the promotion of new order of socialist market-oriented economy.</p>
